Application limits:	according to technical rules for hazardous substances TRGS 900 "Occupational exposure limits" with half/quarter mask: 30 times the occupational exposure limit value with full face mask: 400 times the occupational exposure limit value Maximum permissible Gas concentration: of gas filter class 2 (A2, B2, E2, K2) = 5,000 ml/m³	
Instructions for use:	The use of respiratory filters requires a basic knowledge of the function and handling of respiratory protective devices. Information on this can be found in the trade association regulations and rules, in particular in DGUV Rule 112-190. The use of respiratory protective devices generally means additional strain for the person wearing the respiratory protective device. Most respiratory protective devices require occupational health screening in accordance with the "Ordinance on Occupational Health Care" (ArbMedVV). Damaged filters must not be used.
